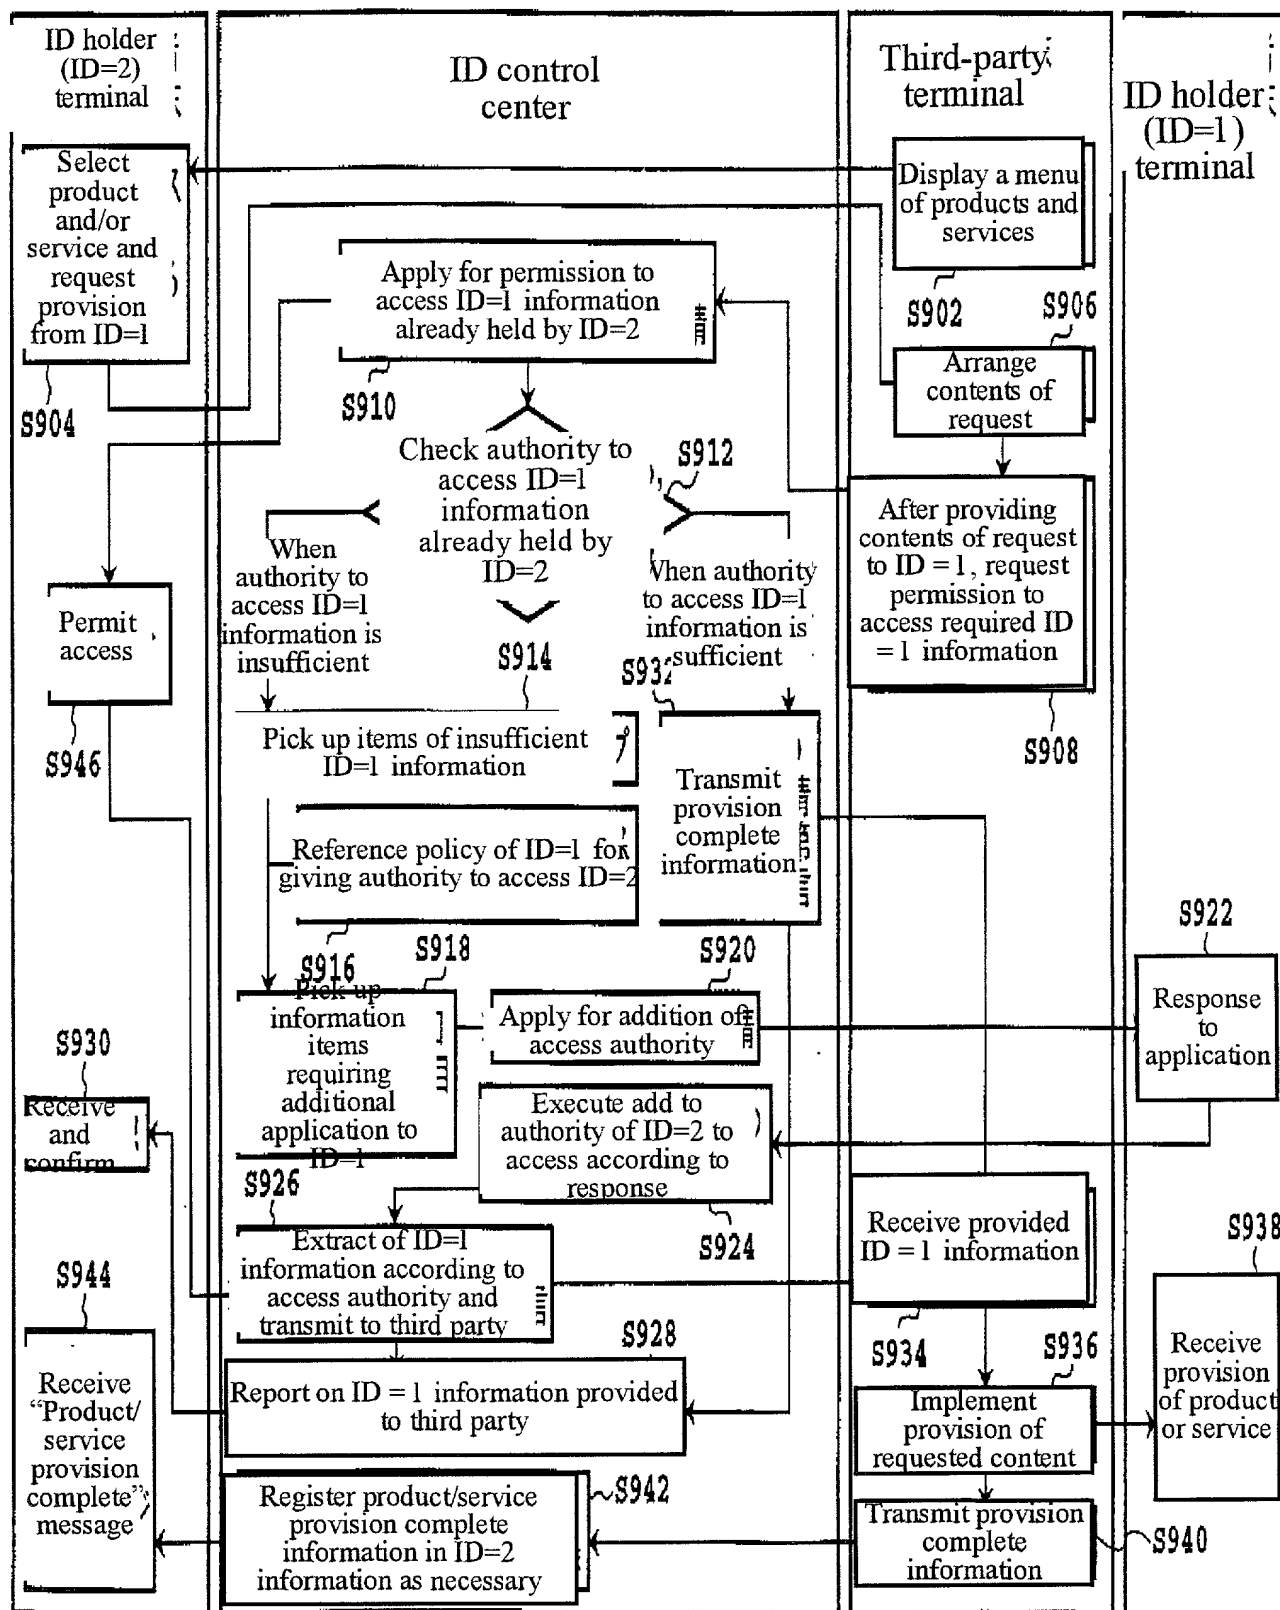

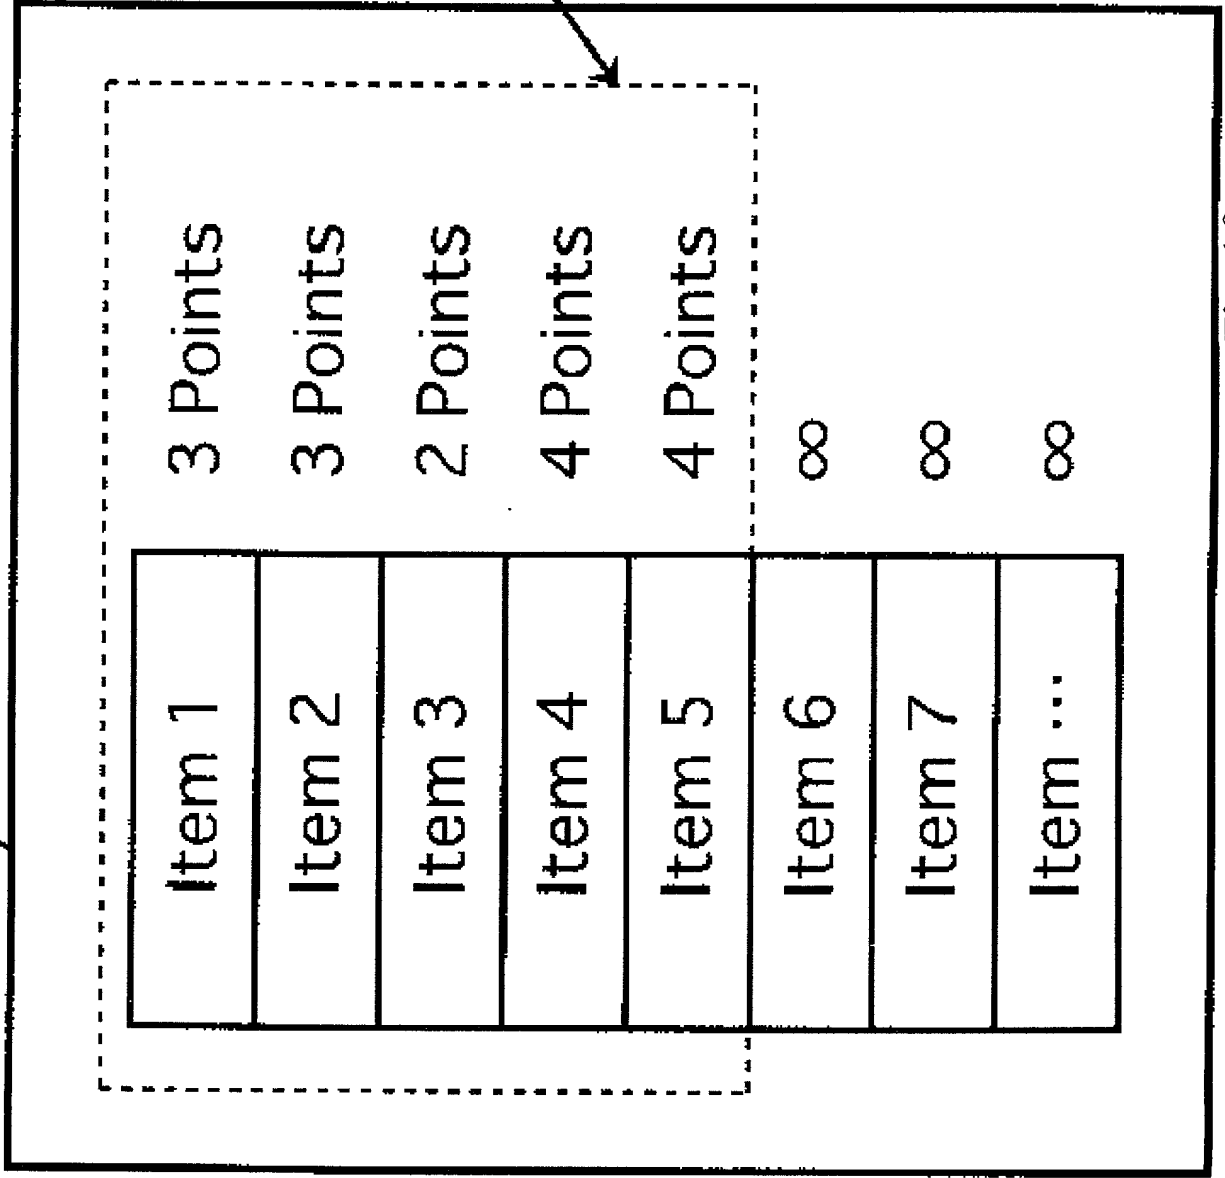

Fig. 9

The diagram illustrates the process of information exchange between two agents and their respective information providers (ID holders).

Agents:

- Agent on accessing side:** Represented by a vertical rectangle.
- Agent on Information Provider side:** Represented by a vertical rectangle.

Information Providers (ID holders):

- Information provider (ID holder) on the left:** Represented by a device with a screen and buttons.
- Information provider (ID holder) on the right:** Represented by a device with a screen and buttons.

Interactions:

- Agented request:** An arrow points from the left ID holder to the Agent on accessing side, and another arrow points from the right ID holder to the Agent on Information Provider side.
- Negotiation by dialog:** A double-headed arrow connects the Agent on accessing side and the Agent on Information Provider side.
- Report:** An arrow points from the Agent on accessing side to the left ID holder, and another arrow points from the Agent on Information Provider side to the right ID holder.
